

Name: **Sam**Date and Subject: **June 9th, Social Studies**

## Recap and Reflect: Journal Entry

Write the Building Challenge from the Challenge Card here:

**Build a model that represents an innovation that has changed the way people live.**

In the box below, attach a photo or sketch or write a description of the LEGO® model you created:

Write what your model means and the story behind it here.

**My model shows a light bulb. The light bulb has been a very important invention. Without it, people would have to use candles if they wanted to see at night or in a dark room. Candles do not produce as much light as a light bulb and are more dangerous because if they are knocked over, they can start a fire. People are safer and their lives are easier because of the light bulb.**
